Federal Communications Commission
445 12th Street SW
Washington, DC 20554

**Re: Comment Deadlines Established Regarding the LightSquared Technical
Working Group Report, IB Docket No. 11-109**

Dear Ms. Dortch,

I sincerely urge the Commission to continue working for a solution to the LightSquared/GPS interference issues. We must not waste this opportunity to increase our broadband spectrum.

LightSquared is an established communications provider with sufficient capital and expertise to construct a national next-generation broadband wireless network. Its network would greatly expand our nation's broadband wireless spectrum at a time when demand for wireless data downloads is exploding. As someone who has worked to ensure our national security, I have seen the importance of having top notch technology available, especially in rural areas, which is the bulk of our country.

In addition to LightSquared creating new opportunities, GPS is an important technology that clearly should be protected. We must not squander the chance for a privately funded new national wireless broadband provider to launch service. We must continue to move forward and not be impeded because of older technology.

America needs both LightSquared and GPS. Please find a solution.

Sincerely,
Rhode Chung
